Telephone and Meeting Booths

mute_labs

Work Redefined:

Focus and collaboration for every office and every team

With our telephone and meeting booths, we have set a new standard for modern work. Open offices are often noisy and full of distractions — but it doesn't have to be that way. Our vision is to create retreat spaces that everyone can afford.

That's why we've developed high-quality, functional spaces that enable focused work, uninterrupted video calls, and confidential conversations. Places that provide you with peace when you need it —and foster collaboration when it matters most.

High-Quality
Production

Affordable for everyone

Minimalist,
Functional Design

Locally produced in Germany

100% Worry-Free

From order to delivery

compact and private

SOLO

Ideal for everyone seeking peace and focus in any office environment

DEEPWORK Booth

Sustainability

For every booth sold, we plant a tree

Made in Germany

We produce in Germany for two reasons. First, this is the only way we can ensure our high standards of quality and craftsmanship. Second, the centrally located production results in shorter delivery routes and a better CO2 footprint.

[To the video](#)

Sustainable materials

To protect the environment, we avoid unnecessary plastic. The wood used comes from sustainable forestry and is certified according to the standards of „FSC,“ „PEFC,“ and the new ISO 38200: 2018. The acoustic felt used is made from recycled PET bottles.

One Booth – One Tree

Since a large part of our phone booths is made of wood, we launched the “One Booth – One Tree” initiative: We put on our rubber boots and, as a team, plant a tree for every booth sold.
